

AER Employee of the Quarter - Jin Wang successfully led the Deltek Costpoint accounting system migration

AER Employee of the Quarter Award (1Q19)

Congratulations to Jin !

Jin Wang successfully led the Deltek Costpoint accounting system migration to Cloud during the quarter. Jin liaised effectively with the external consultant and AER IT to design the cloud migration plan and implemented the required training and testing phases of the migration process. She worked tirelessly and produced various eTimesheet user guides and manuals. She communicated the migration procedures with AER staff and provided prompt troubleshooting for all user issues to ensure a smooth and easy transition for all. Jin's dedication and perseverance contributed greatly to the successful AER accounting system cloud migration, which has gone live since May despite numerous issues with our legacy CER reporting tools and substantial user interface change introduced in the middle of our migration.

AER President Guy Seeley presents Jin with the award
