

Leading in-depth analysis and expert opinion on long range hurricane forecasts for the upcoming season.

hCast-LR Service

- AER's *hCast-LR* service provides in-depth analysis and expert opinion on the seasonal hurricane forecasts from the leading hurricane forecast outlets and consolidates them into one concise report.
- AER hurricane experts compare and contrast the results of hurricane forecasts produced by the three outlets. Each *hCast-LR* report contains an unbiased discussion regarding track records and forecast methodology used by the competing sources.
- Comprehensive reports available within one week of the release of information from the three outlets, Colorado State University (CSU), Tropical Storm Risk Consortium (TSR), and NOAA's Climate Prediction Center (CPC). *hCast-LR* is delivered three times per year in December, May and June, with updates provided as conditions warrant.
- Consultation with AER hurricane experts who sort, analyze, compare and contrast the forecast methodologies from the three outlets to identify the strengths and weaknesses.

hCast-LR Advantage

Minimize Your Risk.

Designed specifically for those involved in the purchase or sale of weather sensitive securities in the financial markets who need to understand the impact of seasonal forecasts in order to make informed buy/sell decisions.

Access to Tropical Storm Experts.

Our team of experts meets with you monthly to discuss the latest forecast data and potential atmospheric changes that could affect the forecast as well as clarify information contained in the hurricane analysis and answer your specific questions.

Clear, Concise Reporting.

Detailed reports summarize information critical to your bottom line and allow for quick access to information.
